ABOUT OUR PANEL

Janel Ancayan is a Public Information Specialist (Education) at West Basin Municipal Water District. Her duties involve the coordination of the District's education programs including water treatment facility tours, community science activities, engineering challenges and water learning resources.

Janel has over six years of experience in environmental education and has a lifetime interest in sustainability and community engagement.

Janel joined West Basin in 2018 and assumed the role of Education Coordinator in August 2019. She holds a bachelor's degree in Environmental Studies with a minor in Education from the University of California, Santa Barbara. She is currently pursuing a Masters of Science Education degree from the California State University, Long Beach.

John Kallo is an Instructor at Los Angeles Trade Technical in the Water Supply Technology and for the Electrical Construction and Maintenance program. Prior to becoming an Instructor, John worked in the water industry as an Electrical/Instrumentation Technician for Irvine Ranch Water District, in water treatment, distribution, and wastewater facilities.

His goal is to help students transition from classroom settings to rewarding careers in the water and wastewater utility industries. He feels fortunate to be at LATTC as an Instructor where he serves his community, but more importantly, to help prepare our future generation of water leaders.

Michael Robinson is an Electrical and Instrumentation Tech for Veolia in El Segundo and comes from a family of electricians.

He graduated from LA Trade Tech in 2022 with an Associate of Science in Electrical Construction and Maintenance and continuing my education in water and wastewater.

Before working with Veolia at West Basin's Edward C. Little Water Recycling Facility, he did an Electrical and Instrumentation student internship at Los Angeles County Sanitation Districts.

About the host: **Alec Mackie** is Director of Communications and Marketing for the California Water Environment Association (CWEA). He has two decades of experience within the wastewater industry, including serving on the Water Environment Federation's (WEF) Awards Committee, House of Delegates, and their wipes task force.
