and local county health guidelines.
Policies are subject to change.**

Learn about condition assessment, a key part of the growing asset management movement within the water and wastewater sectors. California's aging facilities are deteriorating, but how do we prioritize what to replace or repair now and what can last another decade?

The San Francisco Bay Section and CWEA's Engineering and Research Committee is proud to present this workshop on the fundamentals of condition assessment. Engineers, operators, mechanics, construction managers, electricians are all welcome to join.
