WORKSHOPS

TUESDAY, APRIL 18
9:30 a.m. - 3:30 p.m.

At the newly remodeled
**Town & Country Resort
San Diego**

WEF Nutrients Conference

Take Control and Get the Nitrogen Out *(using a process simulator)*

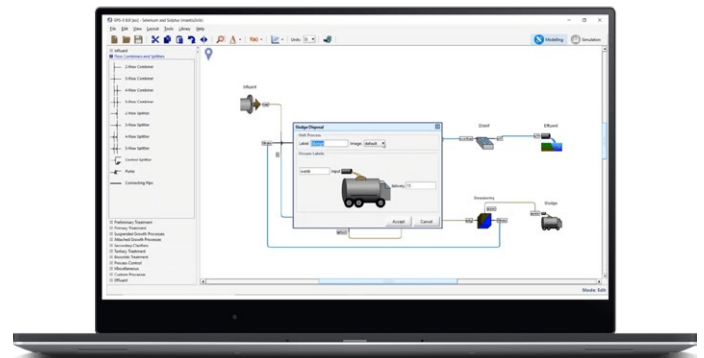

**Fundamentals Of Activated Sludge
Biological Nitrogen Removal and Operation
Troubleshooting Using Process Simulators**

Are you ready to run a treatment plant on your own? Test your skills on a computer simulation that is. This workshop covers the fundamental concepts of operating an activated sludge plant to achieve nitrogen removal via a combination of lecture material and a hands-on process simulator.

Paul Dombrowski
Chief Technologist
Woodard & Curran

Attendees will be led through the simulations to demonstrate how the concept is applied to a plant layout using state-of-the-art SimuWorks™ software based on Hatch's GPS-X program. This is the same simulator used by WEFTEC Ops Challenge. Laptops will be provided. Lunch included. **This workshop has a fee. Early bird deadline is March 25.**
