

CWEA Northern San Joaquin Section “Spill Response Fundamentals” BY SHAWN SPROMBURG

Course Includes:

Theory to Field Application: This rapid-delivery course is strategically split to maximize skill retention. Sessions deliver deep-dive technical and regulatory fundamentals in the classroom. Immediately following, the afternoon session pivots into high-stakes, live field spill simulations, where attendees must apply classroom calculations, response times, and containment tactics to dynamic, real-world field scenarios.

Highlights:

- Regulatory Foundations & Terminology
- Spill Estimation Math
- Field Drills & Spill Simulation Scenarios
- Reporting & Post-Spill Documentation
