RSVP Online:

<https://cwea.me/SCVSNovDinnerMeetingAndPlantTour2026>

Seating is limited to 50 members. Please RSVP by November 9th, 2026

This plant tour and presentation will highlight SVCW's approach to achieving its energy neutrality goals through a four-pronged approach – Supply Side Management, Demand Side Management, Process Improvements, and Implementation of Machine Learning. SVCW is entering its next phase in this with the implementation of new food waste receiving facility and linear generators. The talk will also touch on optimizations and improvements to SVCW's Biosolids Management approach for digestion, dewatering, and biosolids drying.

SPEAKERS

Arvind Akela, Director of Engineering
Alex Miot, Senior Engineer
Anir Bhagwat, Senior Engineer
Silicon Valley Clean Water
