

AC20 Virtual Conference & Expo

LABORATORY TOPICS

I would like to invite all laboratory professionals to attend the AC20 Virtual Conference. There will be something for everyone from the entry-level technicians to the Laboratory Supervisor. Sessions will include information on the QA needed for the most frequently analyzed methods in POTW's, using your LIMS to meet the new regulatory documentation requirements and most importantly, a regulations update by ELAP staff and one small labs story of how they have already achieved compliance with the proposed regulations. It should be a fun and educational day for all of us! – *Mindy Boele, Laboratory Committee Chair and Water Quality Manger for the City of Vacaville*
