

Join us at CWEA's AC20 Virtual Conference & Expo

The annual California Water Environment Association Conference & Expo (AC20) is going virtual from **October 19-22, 2020**. From the safety of your screen, access California's premier event for wastewater professionals, providing professional development, industry solutions, and networking opportunities.

Our conference theme, **This Is Why**, is more important now than ever before: as our communities face unprecedented hurdles, coming together to connect, collaborate, and celebrate our industry network is paramount. AC20 Virtual will remind us why we take pride in protecting and harnessing the potential of California's most critical resource.

OUR CORE AC BENEFITS

As always, AC20 will serve as the one-stop-shop for professional growth within the wastewater community. From your home or office, enjoy all of the event's traditional core offerings:

- Keynotes, roundtable discussions, and in-depth sessions from **industry leaders** tackling emerging challenges, totaling **60 hours** of live, interactive content over three days.
- **Networking** opportunities with industry peers via live chat and video features, hosted games, and interactive sessions.
- A virtual expo hall packed with over 100 exhibitors and vendors, allowing attendees to **browse new technologies** and connect with solution providers in real-time.

IN A NEW VIRTUAL FORMAT

While this year's AC20 will be held in cyberspace, we anticipate it being our most interactive and participatory conference yet with more than 1,000 participants. Our virtual platform is tailored to deliver AC20 content in ways that work best for you:

- To maximize collaboration, AC20 will utilize a premier platform that offers an **immersive experience** far more valuable than a standard webinar.
- Online delivery provides flexibility – **see presentations live or (re)watch them on-demand any time**. Freely connect with any other attendee.
- Eliminating travel helps cut costs and **enables more wastewater professionals to join AC** than ever before!

NETWORKING IS BACK

ALL FROM THE SAFETY OF YOUR HOME OR OFFICE

#CWEA20

On the Agenda

HERE'S A LOOK AT AC20'S FEATURED SESSIONS

- At the Opening General Session for **AC20 This Is Why**, Fredi Lajvardi will discuss the importance of inspiring the next generation of wastewater professionals.
- The full-day **Regional San Summit** will focus on the Echo Water Project, hosting the engineers, operators, and consultants behind the \$1.75 billion water resource recovery project.
- During our **PFAS Summit**, SCAP's Steve Jeppsen will facilitate a series of discussions covering the latest news and perspectives surrounding this cutting-edge topic.
- **64 sessions** covering a range of practice areas, including: **collection systems, operations and maintenance, advanced treatment technologies, engineering and research, laboratory, state regulations and more**

As always, the schedule is packed with a variety of networking events – from a virtual “scavenger hunt” to a women’s networking lunch. Through game-based, small-group, formal, or one-on-one formats, **AC20 Virtual provides numerous pathways for you to connect, engage, and learn.**

PROTECTING
CALIFORNIA'S
MOST CRITICAL
RESOURCE

Keynote speaker Fredi Lajvardi inspired a high school science team to win a national robotics competition. An inspiring story turned into the movie *Spare Parts* starring George Lopez.

Networking is back with our premier virtual conference platform.

Echo Water project at Regional San in Sacramento.
