# Wastewater Surveillance Workshop

## You're Invited!

Join the Water Environment Federation and the National Wastewater Surveillance System's California Center of Excellence at a free one-day workshop focused on wastewater surveillance program sustainability and practical stakeholder communication tools

### Wastewater Utility and Program Sustainability

Explore and brainstorm solutions to sustain wastewater surveillance monitoring, as well as ways to support participation of wastewater utilities

### Strategic Communication for Stakeholder Engagement

Identify and learn practical communication tools to improve stakeholder engagement and strengthen buy-in for wastewater surveillance programs through data interpretation and communication

### Networking and Idea Exchange

Provide a platform for wastewater and public health community members to meet, share insights, and collaborate

## More details

The workshop will include panel discussions from leading experts and breakout sessions designed to define the needs and challenges for wastewater monitoring program sustainability and stakeholder engagement. Attendees will represent public health and wastewater organizations across the California CoE's region. This is an opportunity to connect with other professionals and gain valuable insights in this evolving field.

## Need travel support?

This workshop is free to attend. In addition, WEF has a reimbursement program with limited funds in place to help offset some travel expenses based on [GSA rates](#) and the [City Pair Program](#). If an individual's organization permits reimbursements, please contact [nwbe@wef.org](mailto:nwbe@wef.org) for more details.
