

# COLLABORATIVE PROJECT DELIVERY

More and more projects are utilizing collaborative delivery methods to deliver innovative, flexible, and successful projects. Unlike conventional design-bid-build projects, collaborative delivery methods provide owner, designer, and builder input early and throughout the project providing a better distribution of risk, control, and creativity. This seminar will cover the core concepts of collaborative project delivery and provide perspective from experienced engineers, contractors, and owners.

**When:** Wednesday, May 24, 2023  
8:00am - 3:30pm | Check-in Begins at 7:30am

**Where:** Brown and Caldwell  
201 North Civic Drive, Suite 300, Walnut Creek, CA 94596  
P: 925.937.9010  
Enter at the South Lobby and take elevator to the 3rd floor

**Who:** Planners, Engineers, Project Managers, Program Managers and other water/wastewater professionals interested in learning more about collaborative project delivery methods.

- Topics:**
- Collaborative Project Delivery 101 - Principles of Collaborative Delivery Methods, Apportioning Risk, Procurement Fundamentals, Implementation and Comfort Zones, Market Trends for Collaborative Delivery in Water/Wastewater - *Leofwin Clark, Water Collaborative Delivery Association (formerly Water Design Build Council)*
  - RESCUing Silicon Valley's Wastewater Conveyance System Using Progressive Design-Build - *Kim Hackett, Silicon Valley Clean Water*
  - Contractor's Perspective of Progressive Design-Build - *Jonathan Keaney, Walsh Group*
  - Case Study #3 - TBD
  - Case Study Q&A and Panel Discussion - *Guy Voss, HDR, Moderator*

**Cost:** \$120 for Members      \$180 for Non-Members  
\$20 for Student Members      \$40 for Student Non-Members
