

# CELEBRATING HYPERION'S 100<sup>TH</sup> BIRTHDAY

THURSDAY  
OCT. 30<sup>TH</sup>

Featuring

**Nick Pinhey**

Independent Researcher  
and CWEA Historian

**Join LABS and SARBS for a networking lunch, history talk, and tour of Hyperion's advanced water treatment pilot facility.** In 1925 Hyperion's Screening Plant was constructed by the City of Los Angeles on a beachfront parcel in Playa Del Rey. Since then, one of America's largest water reclamation facilities has seen thousands of projects, innovations, and achievements. The constant stream of innovations and

projects continues, as the team embarks on the next phase, developing the Advanced Water Purification Facility. Join fellow clean water professionals from LABS and SARBS as we celebrate Hyperion at 100. Hear stories from the past, learn about the AWPf project, and take a tour. **When registering, choose a morning or afternoon tour. Wear closed toe shoes and please carpool.**

Register on the  
CWEA website
