

ADVANCING NANOBUBBLE TECHNOLOGY

Come join LABS of CWEA and other water industry professionals to learn about how the Moleaer nanobubble technology is revolutionizing the water and wastewater treatment industry. With over 3,000 installations world wide, their technology treats over one-billion gallons of water every day in over 20 countries.

The event will be at Frantone's Pizza & Spaghetti Villa in Cerritos with networking opportunities from 5:30 PM through the evening. Please use the QR code below to access tickets. We hope to see you there.
