Attendance is Limited so Register Today!

- Limited to 30 attendees
- Lunch will be provided
- Participants must wear closed toe shoes

SPECIAL NOTE:
1 CWEA Contact Hours is available for this event

Wastewater Treatment: The facility receives about 5 million gallons of wastewater per day, with spikes over 20 million gallons during the rainy season. The facility treats wastewater to a secondary level through physical, biological and chemical processes. Treated effluent is safely disposed of through a collectively owned discharge pipe into the San Francisco Bay.

Plant Loading: The facility has the highest BOD load and the third highest TSS Load of all 28 facilities operating in the Bay Area.

Solids Collection: The treatment facility removes approximately 6,000,000 lbs of solids from the wastewater each year. The facility produces approximately 2000 tons of Class B biosolids each year. These biosolids are taken to be used in beneficial land applications.

Recycled Water: The Plant provides 100 million gallons of treated water per year to the Monarch Bay Golf Course.

Pay by Credit cards online, CWEA does not charge a fee. For other payment methods, contact Ritika. No refunds, attendee substitutions allowed.
